## STUDENT EXPERIENCE

The quality of studies is high and the opportunities offered for students and graduates are many.

**Dilan Ortiz** is a student of Telecommunication technologies and Data transmission engineering at Riga Technical University. "Once I participated in a summer school in Latvia as an exchange student through my home university and I loved it so much that I decided to stay and become a full-time student."

An open mind and willingness to embrace change helped me to make transition to one of the Baltics states and RTU a smooth one and Latvian language and culture have been my favorite classes to take. I strongly advise others to come and study at RTU as the quality of studies is high and the opportunities offered for students and graduates are several. There is a lot to see and do in Latvia. Make sure you take advantage of it. Make plans after graduation to continue continuing my studies (to PhD) and then we'll see what happens."

Living in Latvia has been an excellent choice for a student.

**Reetta Suves** is a medicine student at the University of Latvia. "I got into the University of Latvia and began my studies there in September 2018. I was excited to learn new things but also terrified by the amount of knowledge we had to memorize in a short period of time. I worked hard and tirelessly through the pre-clinics and third and fourth year. I still have two more years to go until graduation but I know already I will miss these years and especially these friends we have had together as a study group. I wish I could take them home with me. Latvia will forever have a special place in our hearts."

## Study@Latvia

The most important thing for me has always been the quality of teaching.

**Ana Mamlade** has graduated Law and Diplomacy at Riga Graduate School of Law. "I recommend embracing Latvia's role as a cultural and academic hub in Europe. The multicultural atmosphere and the chance to explore law and diplomacy in a European context were especially appealing."

Latvia pleasantly surprised me with its welcoming community and supportive network of students and faculty. The country's focus on innovation and sustainability added to the dynamic learning environment. For future students, I recommend embracing Latvia's role as a cultural and academic hub, engaging with local traditions, and exploring beyond academics. Stay open-minded and proactive, and you'll find studying in Latvia is a journey of exploration and growth.

I was really amazed by the beautiful weather.

**Irem Kurt** is a Master student of Big Data Analysis at RISEBA University of Applied Sciences. "Teachers and my classmates made sure I felt super welcomed and comfortable."

"To the new students who want to come to Latvia but are afraid because of language or social life. You will be surprised by how many people speak English in Latvia, and there are lots of international clubs in schools, so don't be shy or afraid to join them. Regarding my studies, I can't say enough in IT classes. Latvia offers generous scholarships to international students. With the help of my teachers from school, I applied for this scholarship and got selected to receive it."
